DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-43, drawn to outputting a memory access command that is received by each device in a memory chain, classified in class 711, subclass 150.
- II. Claims 44-56, drawn to recording a device identifier in a register, classified in class 711, subclass 109.
- III. Claims 57-75, drawn to retrieving data from an array in response to an I/O interface, classified in class 710, subclass 5.
- IV. Claims 76-77, drawn to outputting a read command, delaying, then outputting a data-pickup command, classified in class 713, subclass 500.

Inventions I, II, III, and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, Invention I has separate utility, such as selecting 2 or more memory devices to be accessed upon outputting a memory access command that is received by each device in a memory chain, which may be performed separately from the other inventions. Invention II discloses a memory device that records a predetermined device identifier in a device identifier register if a first interconnect structure is coupled to a reference voltage node. Invention III denotes a semiconductor memory device that retrieves data from a storage array in response to a read command and outputs the data via an I/O interface. Finally, Invention IV discloses a memory controller that outputs a read command, performs a delay, and then outputs a

data-pickup command so that data receipt would be enabled.

Because these inventions are distinct for the reasons given above, and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
